INDEX TO AUTHORS

A

Abdou, Ismail A., and **Tarver, Harold.** Plasma protein. I. Loss from circulation and catabolism to carbon dioxide, 769

— and —. II. Relationship between circulating and tissue protein, 781

Ackermann, W. W. See *Swendseid, Bethell, and Ackermann,* 791

Adelberg, Edward A., Bonner, David M., and **Tatum, E. L.** A precursor of isoleucine obtained from a mutant strain of *Neurospora crassa,* 837

—. See *Tatum and Adelberg,* 843

Altman, Kurt I. See *Richmond, Altman, and Salomon,* 817

Armstrong, Marvin D., and **Lewis, Joy D.** Effect of phenylalanine on the toxicity of 4-fluorophenylalanine, 461

B

Balls, A. K. See *Jansen, Curl, and Balls,* 557

Banerjee, Sachchidananda, and **Deb, Chandicharan.** Effect of scurvy on cholesterol and ascorbic acid in guinea pig adrenals, 177

Barkulis, S. S., and **Lehninger, Albert L.** Myokinase and the adenine nucleotide specificity in oxidative phosphorylations, 339

Beatty, Clarissa H., and **West, Edward S.** The effect of substances related to the tricarboxylic acid cycle upon ketosis, 603

Beckmann, Charles O., and **Roger, Muriel.** The question of the branching enzyme in potatoes, 467

Beinert, Helmut. The extent of artificial redistribution of cytochrome *c* in rat liver homogenates, 287

Bennett, Barbara A. See *Schweigert, Bennett, and Guthneck,* 697

Berg, Paul. Synthesis of labile methyl groups by guinea pig tissue *in vitro,* 31

Bethell, Frank H. See *Swendseid, Bethell, and Ackermann,* 791

Bidinost, Lidia E. Rate of formation of myosin in the muscle of the rat, 423

Bird, O. D., and **Hoevet, Barbara.** The vitamin B_{12}-binding power of proteins, 181

Bloom, B. See *Chaikoff, Bloom, Stevens, Reinhardt, and Dauben,* 431

Bloom, Walter Lyon. See *McGhee, Papageorge, Bloom, and Lewis,* 127

Bodansky, Oscar, and **Markardt, Blanch.** Effect of Reichstein's Compound L acetate on plasma, liver, and kidney vitamin A, 83

Bonner, David M. See *Adelberg, Bonner, and Tatum,* 837

—. See *Yanofsky and Bonner,* 211

Borek, Ernest, and **Waelsch, Heinrich.** The effect of temperature on the nutritional requirement of microorganisms, 191

Bragdon, Joseph H. Colorimetric determination of blood lipides, 513

Brigham, Elizabeth H. See *Chase and Brigham,* 529

Brown, G. W., Jr. See *Chaikoff, Goldman, Brown, Dauben, and Gee,* 229

Butler, G. C. See *Marko and Butler,* 165

Butts, Joseph S. See *Terriere and Butts,* 1

C

Campbell, Jack J. R., and **Stokes, Flora Norris.** Tricarboxylic acid cycle in *Pseudomonas aeruginosa,* 853

Carstensen, Hans. See *Li, Tiselius, Pedersen, Hagdahl, and Carstensen,* 317

Chaikoff, I. L., Bloom, B., Stevens, B. P., Reinhardt, W. O., and **Dauben, W. G.** Pentadecanoic acid-5-C^{14}: its absorption and lymphatic transport, 431

XUM

Chaikoff, I. L., Goldman, D. S., Brown, G. W., Jr., Dauben, W. G., and **Gee, Mildred.** Acetoacetate formation in liver. I. From palmitic acid-1-C^{14}, 5-C^{14}, and 11-C^{14}, 229

Chase, Aurin M., and **Brigham, Elizabeth H.** The ultraviolet and visible absorption spectra of *Cypridina* luciferin solutions, 529

Chauncey, Howard H. See *Seligman, Chauncey, Nachlas, Manheimer, and Ravin*, 7

Cheng, L. T. See *Sirny, Cheng, and Elvehjem*, 547

Chenoweth, Maynard B. See *Kandel and Chenoweth*, 223

Chitre, R. G. See *Williams, Chitre, and Elvehjem*, 455

Chu, Edith Ju-Hwa. See *Chu, Green, and Chu*, 643

Chu, T. C., Green, Sister Agnes Ann, and **Chu, Edith Ju-Hwa.** Paper chromatography of methyl esters of porphyrins, 643

Clandinin, D. R., Stevens, Joan M., Morrison, A. B., and **Robblee, A. R.** Liberation of lysine by acid and enzymes from heated lysine-glucose mixture, 219

Cohen, Philip P. See *Sorof and Cohen*, 303, 311

Cori, Gerty T. See *Nussenbaum and Hassid*, 673

Corson, Marion H. See *Leifer, Roth, Hogness, and Corson*, 595

Cotzias, George C., and **Dole, Vincent P.** Metabolism of amines. I. Microdetermination of monoamine oxidase in tissues, 665

Courville, Donovan A., and **Ledington, William.** A new method of assay for serum esterase, 575

Curl, A. Laurence. See *Jansen, Curl, and Balls*, 557

Curran, George L., and **Rittenberg, D.** The rôle of ethyl alcohol in the biological synthesis of cholesterol, 17

D

Dauben, W. G. See *Chaikoff, Bloom, Stevens, Reinhardt, and Dauben*, 431

Dauben, W. G. See *Chaikoff, Goldman, Brown, Dauben, and Gee*, 229

Deb, Chandicharan. See *Banerjee and Deb*, 177

Dole, Vincent P. See *Cotzias and Dole*, 665

E

Elvehjem, C. A. See *Sirny, Cheng, and Elvehjem*, 547

—. See *Williams, Chitre, and Elvehjem*, 455

F

Farber, Milton, Mackenzie, Julia B., Rosenkrantz, Harris, and **Milhorat, Ade T.** Preparation and biologic assay of esters of α-tocopherylhydroquinone, 445

Fling, Marguerite, and **Horowitz, N. H.** Threonine and homoserine in extracts of a *methionineless* mutant of *Neurospora*, 277

Forchielli, Enrico. See *Jeanloz and Forchielli*, 537

Frankel, Sam. See *Roberts and Frankel*, 505

Fraser, Dean, and **Johnson, Frank H.** Pressure-temperature relationship in the rate of casein digestion by trypsin, 417

Fried, Melvin. See *Fruton, Johnston, and Fried*, 39

Fruton, Joseph S., Johnston, Robert B., and **Fried, Melvin.** Elongation of peptide chains in enzyme-catalyzed transamidation reactions, 39

Fukuhara, T. Kay, and **Visser, Donald W.** Pyrimidine nucleoside antagonists, 95

G

Gee, Mildred. See *Chaikoff, Goldman, Brown, Dauben, and Gee*, 229

Geyer, R. P., Waddell, William R., Pendergast, Joyce, and **Yee, George S.** Oxidation of lipides (—C^{14}OO—) *in vivo* by extrahepatic rat tissues, 437

Gigger, Richard P. See *Stevens, Halpern, and Gigger*, 705

Gilbert, James B., Otey, M. Clyde, and **Price, Vincent E.** The enzymatic susceptibility of the red cobalt complexes of several dipeptides, 377
Goldman, D. S. See *Chaikoff, Goldman, Brown, Dauben, and Gee,* 229
Goldwasser, Eugene, and **Putnam, Frank W.** Physicochemical properties of bacteriophages. III. Diffusion of bacteriophage T_6, 75
Green, Sister Agnes Ann. See *Chu, Green, and Chu,* 643
Greenberg, David M. See *La Du and Greenberg,* 245
Greenberg, G. Robert. *De novo* synthesis of hypoxanthine via inosine-5-phosphate and inosine, 611
Gunsalus, I. C. See *Wood and Gunsalus,* 403
Guthneck, Barbara Tait. See *Schweigert, Bennett, and Guthneck,* 697

H

Hagdahl, Lennart. See *Li, Tiselius, Pedersen, Hagdahl, and Carstensen,* 317
Halpern, Philip E. See *Stevens, Halpern, and Gigger,* 705
Hassid, W. Z. See *Nussenbaum and Hassid,* 673
Herbain, Maurice. See *Velluz and Herbain,* 241
Hoevet, Barbara. See *Bird and Hoevet,* 181
Hogness, David S. See *Leifer, Roth, Hogness, and Corson,* 595
Horowitz, N. H. See *Fling and Horowitz,* 277

I

Illingworth, Barbara. See *Nussenbaum and Hassid,* 673

J

Jansen, Eugene F., Curl, A. Laurence, and **Balls, A. K.** Reaction of α-chymotrypsin with analogues of diisopropyl fluorophosphate, 557
Jeanloz, Roger W., and **Forchielli, Enrico.** Studies on hyaluronic acid and related substances. IV. Periodate oxidation, 537
Johnson, Frank H. See *Fraser and Johnson,* 417
Johnston, Robert B. See *Fruton, Johnston, and Fried,* 39

K

Kandel, Alexander, and **Chenoweth, Maynard B.** The effect of acetyl donors on creatine formation in rats and dogs, 223
Kaufman, Seymour. See *Schwert and Kaufman,* 807
Kennedy, Eugene P., and **Lehninger, Albert L.** Activation of fatty acid oxidation by dihydrodiphosphopyridine nucleotide, 361
Kibrick, Andre C., Rogers, Hannah E., and **Skupp, Sol.** The saccharific determination of amylase in blood plasma and urine, 107
Kleinschmidt, Elaine F. See *Swendseid, Bethell, and Ackermann,* 791
Knight, C. A. Paper chromatography of some lower peptides, 753
Kochakian, Charles D., and **Robertson, Evangeline.** Adrenal steroids and body composition, 495
— and —. Corticoids and body and organ weights, nitrogen balance, and enzymes, 481
Krop, Stephen. See *Michel and Krop,* 119

L

La Du, Bert N., Jr., and **Greenberg, David M.** The tyrosine oxidation system of liver. I. Extracts of rat liver acetone powder, 245
Laskowski, M. See *Laskowski and Laskowski,* 563
Laskowski, M., Jr., and **Laskowski, M.** Crystalline trypsin inhibitor from colostrum, 563
Ledington, William. See *Courville and Ledington,* 575
Lehninger, Albert L. Phosphorylation coupled to oxidation of dihydrodiphosphopyridine nucleotide, 345
—. See *Barkulis and Lehninger,* 339
—. See *Kennedy and Lehninger,* 361

Leifer, Edgar, Roth, Lloyd J., Hogness, David S., and **Corson, Marion H.** The metabolism of radioactive nicotinic acid and nicotinamide, 595
Lewis, George T. See *McGhee, Papageorge, Bloom, and Lewis*, 127
Lewis, Joy D. See *Armstrong and Lewis*, 461
Li, Choh Hao, Tiselius, Arne, Pedersen, Kai O., Hagdahl, Lennart, and **Carstensen, Hans.** Chromatography of adrenocorticotropic peptides, 317
Lindenbaum, Arthur, White, Marcia R., and **Schubert, Jack.** Citrate formation *in vivo* induced by non-lethal doses of fluoroacetate, 585
Lyle, Gloria G. See *Potter, Lyle, and Schneider*, 293

M

Mackenzie, Julia B. See *Farber, Mackenzie, Rosenkrantz, and Milhorat*, 445
MacLeod, Robert A. See *Tsuyuki and MacLeod*, 711
Manheimer, Leon H. See *Seligman, Chauncey, Nachlas, Manheimer, and Ravin*, 7
Markardt, Blanch. See *Bodansky and Markardt*, 83
Marko, A. M., and **Butler, G. C.** The isolation of sodium desoxyribonucleate with sodium dodecyl sulfate, 165
Marsh, Walton H. On the biosynthesis of purines in the bird; rôle of formate, 633
Matthews, Priscilla. See *Beinert*, 287
McCollum, E. V., and **Rider, Agatha A.** The preparation of lysine from protein hydrolysates, 451
McGhee, Eva C., Papageorge, Evangeline, Bloom, Walter Lyon, and **Lewis, George T.** Effect of hyperinsulinism on brain phospholipide, 127
Meister, Alton. Studies on *d*- and *l*-α-keto-β-methylvaleric acids, 269
Michel, Harry O., and **Krop, Stephen.** The reaction of cholinesterase with diisopropyl fluorophosphate, 119
Milhorat, Ade T. See *Farber, Mackenzie, Rosenkrantz, and Milhorat*, 445
Mokotoff, Reuben. See *Ross and Mokotoff*, 659
Moore, Stanford. See *Stein and Moore*, 103
Morrison, A. B. See *Clandinin, Stevens, Morrison, and Robblee*, 219

N

Nachlas, Marvin M. See *Seligman, Chauncey, Nachlas, Manheimer, and Ravin*, 7
Neilands, J. B. A reaction between hemin and bisulfite, 763
Novikoff, Alex B. See *Schein, Podber, and Novikoff*, 331
Nussenbaum, S., and **Hassid, W. Z.** Enzymatic synthesis of amylopectin, 763

O

Ohlmeyer, Paul. A new coenzyme of alcoholic fermentation, 21
Olson, Robert E., and **Stare, F. J.** The metabolism *in vitro* of cardiac muscle in pantothenic acid deficiency, 149
Oster, Gerald. The isoelectric points of some strains of tobacco mosaic virus, 55
Otey, M. Clyde. See *Gilbert, Otey, and Price*, 377

P

Papageorge, Evangeline. See *McGhee, Papageorge, Bloom, and Lewis*, 127
Pardee, Arthur B. Calculations on paper chromatography of peptides, 757
Pedersen, Kai O. See *Li, Tiselius, Pedersen, Hagdahl, and Carstensen*, 317
Pendergast, Joyce. See *Geyer, Waddell, Pendergast, and Yee*, 437
Podber, Estelle. See *Schein, Podber, and Novikoff*, 331
Potter, Van R., Lyle, Gloria G., and **Schneider, Walter C.** Oxidative phosphorylation in whole homogenates and in cell particles, 293

Price, Vincent E. See *Gilbert, Otey, and Price,* 377
Putnam, Frank W. Physicochemical properties of bacteriophages. II. Sedimentation of bacteriophage T_6, 61
—. See *Goldwasser and Putnam,* 75

R

Racker, E. The mechanism of action of glyoxalase, 685
Ravin, Herbert A., and **Seligman, Arnold M.** The colorimetric estimation of carboxypeptidase activity, 391
—. See *Seligman, Chauncey, Nachlas, Manheimer, and Ravin,* 7
Reinhardt, W. O. See *Chaikoff, Bloom, Stevens, Reinhardt, and Dauben,* 431
Reiss, Wilhelm. See *Tint and Reiss,* 133
Richmond, Jonas E., Altman, Kurt I., and **Salomon, Kurt.** The effect of x-radiation on the biosynthesis of hemoglobin, 817
Rider, Agatha A. See *McCollum and Rider,* 451
Rittenberg, D. See *Curran and Rittenberg,* 17
Robblee, A. R. See *Clandinin, Stevens, Morrison, and Robblee,* 219
Roberts, Eugene, and **Frankel, Sam.** Further studies of glutamic acid decarboxylase in brain, 505
Robertson, Evangeline. See *Kochakian and Robertson,* 481, 495
Roger, Muriel. See *Beckmann and Roger,* 467
Rogers, Hannah E. See *Kibrick, Rogers, and Skupp,* 107
Rosenberg, Margaret. See *Ross and Mokotoff,* 659
Rosenkrantz, Harris. See *Farber, Mackenzie, Rosenkrantz, and Milhorat,* 445
Ross, George, and **Mokotoff, Reuben.** Determination of inulin in muscle, 659
Roth, Lloyd J. See *Leifer, Roth, Hogness, and Corson,* 595

S

Salomon, Kurt. See *Richmond, Altman, and Salomon,* 817
Samuels, Leo T. See *West and Samuels,* 827
Schein, Arnold H., Podber, Estelle, and **Novikoff, Alex B.** The intracellular localization of uricase, 331
Schlamowitz, Max. On the nature of rabbit liver glycogen. II. Iodine absorption spectrum, 519
Schneider, Walter C. See *Potter, Lyle, and Schneider,* 293
Schubert, Jack. See *Lindenbaum, White, and Schubert,* 585
Schweigert, B. S., Bennett, Barbara A., and **Guthneck, Barbara Talt.** Further studies on the amino acid composition of pork and lamb cuts, 697
Schwert, George W. The molecular size and shape of the pancreatic proteases. II. Chymotrypsinogen, 799
— and **Kaufman, Seymour.** The molecular size and shape of the pancreatic proteases. III. α-Chymotrypsin, 807
Seligman, Arnold M., Chauncey, Howard H., Nachlas, Marvin M., Manheimer, Leon H., and **Ravin, Herbert A.** The colorimetric determination of phosphatases in human serum, 7
—. See *Ravin and Seligman,* 391
Seligson, David, and **Seligson, Harriet.** The conversion of alloxan to alloxanic acid in plasma, 647
Seligson, Harriet. See *Seligson and Seligson,* 647
Sirny, R. J., Cheng, L. T., and **Elvehjem, C. A.** An arginine-proline interdependence in *Leuconostoc mesenteroides* P-60, 547
Skupp, Sol. See *Kibrick, Rogers, and Skupp,* 107
Sorof, Sam, and **Cohen, Philip P.** Electrophoretic and ultracentrifugal studies of soluble proteins of rat liver, 311
— and —. Electrophoretic studies of the soluble proteins of rabbit liver, 303

Spicer, Samuel S. Gel formation caused by adenosinetriphosphate in actomyosin solutions, 257
Stare, F. J. See *Olson and Stare*, 149
Stein, William H., and **Moore, Stanford.** Electrolytic desalting of amino acids. Conversion of arginine to ornithine, 103
Steinhardt, Jacinto, and **Zaiser, Ethel M.** Masking of acid-binding groups in native horse carbonylhemoglobin, 197
Stevens, B. P. See *Chaikoff, Bloom, Stevens, Reinhardt, and Dauben*, 431
Stevens, Carl M., Halpern, Philip E., and **Gigger, Richard P.** Occurrence of D-amino acids in some natural materials, 705
Stevens, Joan M. See *Clandinin, Stevens, Morrison, and Robblee*, 219
Stokes, Flora Norris. See *Campbell and Stokes*, 853
Swanson, Ann Louise. See *Swendseid, Bethell, and Ackermann*, 791
Swendseid, Marian E., Bethell, Frank H., and **Ackermann, W. W.** The intracellular distribution of vitamin B_{12} and folinic acid in mouse liver, 791

T

Tarver, Harold. See *Abdou and Tarver*, 769, 781
Tatum, E. L., and **Adelberg, Edward A.** Origin of the carbon skeletons of isoleucine and valine, 843
—. See *Adelberg, Bonner, and Tatum*, 837
Teas, H. J. Effect of canavanine on mutants of *Neurospora* and *Bacillus subtilis*, 369
Terriere, L. C., and **Butts, Joseph S.** The influence of amino acids on glycogen formation studied with deuterium, 1
Tint, Howard, and **Reiss, Wilhelm.** Some properties of a bacillomycin *b*-cytochrome *c* complex, 133
Tiselius, Arne. See *Li, Tiselius, Pedersen, Hagdahl, and Carstensen*, 317
Tsuyuki, Hiroshi, and **MacLeod, Robert A.** Ion antagonisms affecting glycolysis by bacterial suspensions, 711

U

Udenfriend, Sidney, and **Velick, Sidney F.** The isotope derivative method of protein amino end-group analysis, 733
—. See *Velick and Udenfriend*, 721

V

Velick, Sidney F., and **Udenfriend, Sidney.** Isotope derivative analysis for proline, valine, methionine, and phenylalanine, 721
— and **Wicks, Lester F.** The amino acid composition of phosphorylase, 741
—. See *Udenfriend and Velick*, 733
Velluz, Leon, and **Herbain, Maurice.** Oxythiamine triphosphoric acid, an effective inhibitor of the carboxylase system, 241
Visser, Donald W. See *Fukuhara and Visser*, 95

W

Waddell, William R. See *Geyer, Waddell, Pendergast, and Yee*, 437
Waelsch, Heinrich. See *Borek and Waelsch*, 191
West, Charles Donald, and **Samuels, Leo T.** The metabolism of testosterone and related steroids by kidney tissue, 827
West, Edward S. See *Beatty and West*, 603
White, Marcia R. See *Lindenbaum, White, and Schubert*, 585
Wicks, Lester F. See *Velick and Wicks*, 741
Williams, J. N., Jr., Chitre, R. G., and **Elvehjem, C. A.** Effects of folic acid and aminopterin on rat liver metabolism, 455
Wilson, Irwin B. Acetylcholinesterase. XI. Reversibility of tetraethyl pyrophosphate inhibition, 111

Wood, W. A., and Gunsalus, I. C. D-Alanine formation: a racemase in *Streptococcus faecalis*, 403

Y

Yanofsky, Charles, and Bonner, David M. Studies on the conversion of 3-hydroxyanthranilic acid to niacin in *Neurospora*, 211

Yee, George S. See *Geyer, Waddell, Pendergast, and Yee*, 437

Z

Zaiser, Ethel M. See *Steinhardt and Zaiser*, 197

INDEX TO SUBJECTS

A

Acetate: Fluoro-. *See* Fluoroacetate

Acetoacetate: Formation, liver, *Chaikoff, Goldman, Brown, Dauben, and Gee*, 229

—, —, palmitic acid, labeled, effect, *Chaikoff, Goldman, Brown, Dauben, and Gee*, 229

Acetyl: Donors, creatine formation *in vivo*, effect, *Kandel and Chenoweth*, 223

Acetylcholinesterase: *Wilson*, 111

Actomyosin: Solutions, gel formation, adenosinetriphosphate effect, *Spicer*, 257

Adenine nucleotide: Phosphorylations, oxidative, specificity, *Barkulis and Lehninger*, 339

Adenosinetriphosphate: Actomyosin solutions, gel formation, effect, *Spicer*, 257

Adrenal(s): Ascorbic acid, scurvy effect, *Banerjee and Deb*, 177

Cholesterol, scurvy effect, *Banerjee and Deb*, 177

Steroids, body composition, relation, *Kochakian and Robertson*, 495

Adrenocorticotropic peptide(s): Chromatography, *Li, Tiselius, Pedersen, Hagdahl, and Carstensen*, 317

Alanine: D-, formation, *Wood and Gunsalus*, 403

4-Fluorophenyl-. *See* Fluorophenylalanine

Phenyl-. *See* Phenylalanine

Alcohol: Ethyl. *See* Ethyl alcohol

Fermentation, coenzyme, *Ohlmeyer*, 21

Alloxan: Alloxanic acid conversion from, blood plasma, *Seligson and Seligson*, 647

Alloxanic acid: Alloxan conversion to, blood plasma, *Seligson and Seligson*, 647

Amine(s): Metabolism, *Cotzias and Dole*, 665

Amino acid(s): D-, natural materials, *Stevens, Halpern, and Gigger*, 705

Amino acid(s)—*continued:*

Electrolytic desalting, *Stein and Moore*, 103

Glycogen formation, effect, deuterium in study, *Terriere and Butts*, 1

Lamb, *Schweigert, Bennett, and Guthneck*, 697

Phosphorylase, *Velick and Wicks*, 741

Pork, *Schweigert, Bennett, and Guthneck*, 697

Amino end-group(s): Analysis, isotope use, *Udenfriend and Velick*, 733

Aminopterin: Liver metabolism, effect, *Williams, Chitre, and Elvehjem*, 455

Amylase: Blood plasma, determination, saccharific, *Kibrick, Rogers, and Skupp*, 107

Urine, determination, saccharific, *Kibrick, Rogers, and Skupp*, 107

Amylopectin: Synthesis, enzymatic, *Nussenbaum and Hassid*, 673

Anthranilic acid: 3-Hydroxy-. *See* Hydroxyanthranilic acid

Arginine: Ornithine conversion from, *Stein and Moore*, 103

-Proline interdependence, *Leuconostoc mesenteroides, Sirny, Cheng, and Elvehjem*, 547

Ascorbic acid: Adrenal, scurvy effect, *Banerjee and Deb*, 177

B

Bacillomycin: *b*-cytochrome *c* complex, properties, *Tint and Reiss*, 133

Bacillus subtilis: Mutants, canavanine effect, *Teas*, 369

Bacteria: Suspensions, glycolysis, ions, effect, *Tsuyuki and MacLeod*, 711

See also Leuconostoc, Pseudomonas, Streptococcus

Bacteriophage: Physicochemical properties, *Putnam*, 61

Goldwasser and Putnam, 75

T_6, diffusion, *Goldwasser and Putnam*, 75

—, sedimentation, *Putnam*, 61

XUM

Bisulfite: Hemin and, reaction, *Neilands*, 763
Blood: Lipides, determination, colorimetric, *Bragdon*, 513
Blood plasma: Alloxan conversion to alloxanic acid, *Seligson and Seligson*, 647
Amylase, determination, saccharific, *Kibrick, Rogers, and Skupp*, 107
Protein, *Abdou and Tarver*, 769, 781
—, catabolism to carbon dioxide, *Abdou and Tarver*, 769
—, loss, *Abdou and Tarver*, 769
—, tissue and, relation, *Abdou and Tarver*, 781
Vitamin A, Reichstein's Compound L acetate, effect, *Bodansky and Markardt*, 83
Blood serum: Esterase, determination, *Courville and Ledington*, 575
Phosphatases, determination, colorimetric, *Seligman, Chauncey, Nachlas, Manheimer, and Ravin*, 7
Body: Composition, adrenal steroids, relation, *Kochakian and Robertson*, 495
Weight, corticoids, effect, *Kochakian and Robertson*, 481
Brain: Glutamic acid decarboxylase, *Roberts and Frankel*, 505
Phospholipide, hyperinsulinism effect, *McGhee, Papageorge, Bloom, and Lewis*, 127

C

Canavanine: *Bacillus subtilis* mutants, effect, *Teas*, 369
Neurospora mutants, effect, *Teas*, 369
Carbon: Isoleucine, origin, *Tatum and Adelberg*, 843
Valine, origin, *Tatum and Adelberg*, 843
Carbon dioxide: Blood plasma protein catabolism to, *Abdou and Tarver*, 769
Carbonylhemoglobin: Acid-binding groups, masking, *Steinhardt and Zaiser*, 197
Carboxylase: System, oxythiamine triphosphoric acid effect, *Velluz and Herbain*, 241
Carboxylic acid: Tri-. *See* Tricarboxylic acid
Carboxypeptidase: Activity, determination, colorimetric, *Ravin and Seligman*, 391
Casein: Digestion, trypsin, pressure-temperature relationship, *Fraser and Johnson*, 417
Cholesterol: Adrenal, scurvy effect, *Banerjee and Deb*, 177
Biosynthesis, ethyl alcohol rôle, *Curran and Rittenberg*, 17
Cholinesterase: Acetyl-. *See* Acetylcholinesterase
Diisopropyl fluorophosphate, reaction, *Michel and Krop*, 119
Chymotrypsin: α-, diisopropyl fluorophosphate analogues, reaction, *Jansen, Curl, and Balls*, 557
—, pancreas, *Schwert and Kaufman*, 807
Chymotrypsinogen: Pancreas, *Schwert*, 799
Citrate: Formation *in vivo*, fluoroacetate effect, *Lindenbaum, White, and Schubert*, 585
Cobalt: Red, dipeptide complexes, enzymatic effect, *Gilbert, Otey, and Price*, 377
Coenzyme: Alcoholic fermentation, *Ohlmeyer*, 21
Colostrum: Trypsin, crystalline, inhibitor, *Laskowski and Laskowski*, 563
Corticoid(s): Body and organ weights, effect, *Kochakian and Robertson*, 481
Enzymes, effect, *Kochakian and Robertson*, 481
Nitrogen balance, effect, *Kochakian and Robertson*, 481
Creatine: Formation *in vivo*, acetyl donors, effect, *Kandel and Chenoweth*, 223
Cypridina: Luciferin solutions, absorption spectra, *Chase and Brigham*, 529

Cytochrome: *c*, liver homogenates, artificial redistribution, *Beinert*, 287
c-bacillomycin *b* complex, properties, *Tint and Reiss*, 133

D

Decanoic acid: Penta-. *See* Pentadecanoic acid
Decarboxylase: Glutamic acid, brain, *Roberts and Frankel*, 505
Desoxyribonucleate: Sodium. *See* Sodium desoxyribonucleate
Deuterium: Glycogen formation, amino acid effect, use in study, *Terriere and Butts*, 1
Dihydrodiphosphopyridine nucleotide: Fatty acid oxidation, effect, *Kennedy and Lehninger*, 361
Oxidative phosphorylation, relation, *Lehninger*, 345
Diisopropyl fluorophosphate: Analogues, α-chymotrypsin reaction, *Jansen, Curl, and Balls*, 557
Cholinesterase reaction, *Michel and Krop*, 119
Dipeptide(s): Cobalt, red, complexes, enzymatic effect, *Gilbert, Otey, and Price*, 377

E

Enzyme(s): Amylopectin synthesis, *Nussenbaum and Hassid*, 673
Branching, potato, *Beckmann and Roger*, 467
-Catalyzed transamidation reactions, peptide chains, elongation, *Fruton, Johnston, and Fried*, 39
Co-. *See* Coenzyme
Corticoids, effect, *Kochakian and Robertson*, 481
Dipeptide-red cobalt complexes, effect, *Gilbert, Otey, and Price*, 377
Lysine liberation, lysine-glucose mixture, *Clandinin, Stevens, Morrison, and Robblee*, 219
Esterase: Blood serum, determination, *Courville and Ledington*, 575
Choline. *See* Cholinesterase
Ethyl alcohol: Cholesterol biosynthesis, rôle, *Curran and Rittenberg*, 17

F

Fatty acid(s): Oxidation, dihydrodiphosphopyridine nucleotide effect, *Kennedy and Lehninger*, 361
Fluoroacetate: Citrate formation *in vivo*, effect, *Lindenbaum, White, and Schubert*, 585
Fluorophenylalanine: 4-, toxicity, phenylalanine effect, *Armstrong and Lewis*, 461
Folic acid: Liver metabolism, effect, *Williams, Chitre, and Elvehjem*, 455
Folinic acid: Liver, intracellular distribution, *Swendseid, Bethell, and Ackermann*, 791
Formate: Purine biosynthesis, rôle, *Marsh*, 633

G

Glucose: -Lysine mixture, lysine liberation by acid and enzyme, *Clandinin, Stevens, Morrison, and Robblee*, 219
Glutamic acid: Decarboxylase, brain, *Roberts and Frankel*, 505
Glycogen: Formation, amino acid effect, deuterium in study, *Terriere and Butts*, 1
Liver, iodine absorption spectrum, *Schlamowitz*, 3
—, nature, *Schlamowitz*, 519
Glycolysis: Bacterial suspensions, ions, effect, *Tsuyuki and MacLeod*, 711
Glyoxalase: Action, mechanism, *Racker*, 685

H

Heart: *See also* Muscle
Hemin: Bisulfite and, reaction, *Neilands*, 763
Hemoglobin: Biosynthesis, x-radiation effect, *Richmond, Altman, and Salomon*, 817
Carbonyl-. *See* Carbonylhemoglobin
Homoserine: *Neurospora methionineless* mutant, *Fling and Horowitz*, 277
Hyaluronic acid: *Jeanloz and Forchielli*, 537
Periodate oxidation, *Jeanloz and Forchielli*, 537

Hydroquinone: α-Tocopheryl-. *See* Tocopherylhydroquinone
Hydroxyanthranilic acid: 3-, niacin conversion from, *Neurospora, Yanofsky and Bonner,* 211
Hypoxanthine: Synthesis, inosine-5-phosphate and inosine rôle, *Greenberg,* 611

I

Inosine: Hypoxanthine synthesis, rôle, *Greenberg,* 611
Inosine-5-phosphate: Hypoxanthine synthesis, rôle, *Greenberg,* 611
Insulin: Brain phospholipide, effect, *McGhee, Papageorge, Bloom, and Lewis,* 127
Inulin: Muscle, determination, *Ross and Mokotoff,* 659
Iodine: Liver glycogen, absorption spectrum, *Schlamowitz,* 519
Isoleucine: Carbon origin, *Tatum and Adelberg,* 843
Precursor, *Neurospora crassa* mutant, *Adelberg, Bonner, and Tatum,* 837
Isotope(s): Amino acid analysis, use, *Velick and Udenfriend,* 721
Protein amino end-group analysis, use, *Udenfriend and Velick,* 733

K

Keto-β-methylvaleric acid: *d*-α-, *Meister,* 269
l-α-, *Meister,* 269
Ketosis: Tricarboxylic acid cycle-related substances, effect, *Beatty and West,* 603
Kidney: Testosterone and related steroids, metabolism, *West and Samuels,* 827
Vitamin A, Reichstein's Compound L acetate, effect, *Bodansky and Markardt,* 83

L

Lamb: Amino acids, *Schweigert, Bennett, and Guthneck,* 697
Leucine: Iso-. *See* Isoleucine
Leuconostoc mesenteroides: Arginine-proline interdependence, *Sirny, Cheng, and Elvehjem,* 547
Lipide(s): Blood, determination, colorimetric, *Bragdon,* 513
Oxidation, extrahepatic tissues *in vivo, Geyer, Waddell, Pendergast, and Yee,* 437
Phospho-. *See* Phospholipide
Liver: Acetate formation, palmitic acid, labeled, effect, *Chaikoff, Goldman, Brown, Dauben, and Gee,* 229
Acetoacetate formation, *Chaikoff, Goldman, Brown, Dauben, and Gee,* 229
Acetone powder, tyrosine oxidation system, *La Du and Greenberg,* 245
Folinic acid distribution, intracellular, *Swendseid, Bethell, and Ackermann,* 791
Glycogen, iodine absorption spectrum, *Schlamowitz,* 519
—, nature, *Schlamowitz,* 519
Homogenates, cytochrome *c*, artificial redistribution, *Beinert,* 287
Metabolism, aminopterin effect, *Williams, Chitre, and Elvehjem,* 455
—, folic acid effect, *Williams, Chitre, and Elvehjem,* 455
Proteins, soluble, electrophoresis, *Sorof and Cohen,* 303
—, —, — and ultracentrifugation, *Sorof and Cohen,* 311
Tyrosine oxidation system, *La Du and Greenberg,* 245
Vitamin A, Reichstein's Compound L acetate, effect, *Bodansky and Markardt,* 83
— B_{12}, distribution, intracellular, *Swendseid, Bethell, and Ackermann,* 791
Luciferin: *Cypridina,* solutions, absorption spectra, *Chase and Brigham,* 529
Lymphatic(s): Pentadecanoic acid-5-C^{14} transport, *Chaikoff, Bloom, Stevens, Reinhardt, and Dauben,* 431
Lysine: -Glucose mixture, lysine liberation by acid and enzyme, *Clandinin, Stevens, Morrison, and Robblee,* 219
Protein hydrolysates, preparation, *McCollum and Rider,* 451

M

Methionine: Analysis, isotope use, *Velick and Udenfriend*, 721
Methyl group(s): Synthesis, tissue, *in vitro*, *Berg*, 311
Microorganism(s): Nutrition, temperature effect, *Borek and Waelsch*, 191
Mold: *See also Neurospora*
Monoamine oxidase: Tissue, determination, micro-, *Cotzias and Dole*, 665
Mosaic: Tobacco, virus, isoelectric points, *Oster*, 55
Muscle: Inulin determination, *Ross and Mokotoff*, 659
Metabolism *in vitro*, pantothenic acid deficiency, effect, *Olson and Stare*, 149
Myosin formation, *Bidinost*, 423
Myokinase: Phosphorylations, oxidative, specificity, *Barkulis and Lehninger*, 339
Myosin: Acto-. *See* Actomyosin
Muscle, formation, *Bidinost*, 423

N

Neurospora: 3-Hydroxyanthranilic acid conversion to niacin, *Yanofsky and Bonner*, 211
Methionineless mutant, threonine and homoserine, *Fling and Horowitz*, 277
Mutants, canavanine effect, *Teas*, 369
Neurospora crassa: Mutant, isoleucine precursor, *Adelberg, Bonner, and Tatum*, 837
Niacin: 3-Hydroxyanthranilic acid conversion to, *Neurospora, Yanofsky and Bonner*, 211
Nicotinamide: Radioactive, metabolism, *Leifer, Roth, Hogness, and Corson*, 595
Nicotinic acid: Radioactive, metabolism, *Leifer, Roth, Hogness, and Corson*, 595
Nitrogen: Balance, corticoids, effect, *Kochakian and Robertson*, 481
Nucleoside: Pyrimidine. *See* Pyrimidine nucleoside
Nucleotide: Adenine. *See* Adenine nucleotide
Dihydrodiphosphopyridine. *See* Dihydrodiphosphopyridine nucleotide

O

Organ(s): Weight, corticoids, effect, *Kochakian and Robertson*, 481
Ornithine: Arginine conversion to, *Stein and Moore*, 103
Oxidase: Manoamine. *See* Monoamine oxidase
Oxythiamine triphosphoric acid: Carboxylase system, effect, *Velluz and Herbain*, 241

P

Palmitic acid: Labeled, liver acetoacetate formation from, *Chaikoff, Goldman, Brown, Dauben, and Gee*, 229
Pancreas: α-Chymotrypsin, *Schwert and Kaufman*, 807
Chymotrypsinogen, *Schwert*, 799
Proteases, molecular size and shape, *Schwert*, 799
Schwert and Kaufman, 807
Pantothenic acid: Muscle metabolism *in vitro*, deficiency effect, *Olson and Stare*, 149
Pectin: Amylo-. *See* Amylopectin
Pentadecanoic acid-5-C^{14}: Absorption and lymphatic transport, *Chaikoff, Bloom, Stevens, Reinhardt, and Dauben*, 431
Peptidase: Carboxy-. *See* Carboxypeptidase
Peptide(s): Adrenocorticotropic, chromatography, *Li, Tiselius, Pedersen, Hagdahl, and Carstensen*, 317
Chains, enzyme-catalyzed transamidation reactions, elongation, *Fruton, Johnston, and Fried*, 39
Chromatography, *Knight*, 753
Pardee, 757
Di-. *See* Dipeptides
Phenylalanine: Analysis, isotope use, *Velick and Udenfriend*, 721
4-Fluorophenylalanine toxicity, effect, *Armstrong and Lewis*, 461

Phosphatase(s): Blood serum, determination, colorimetric, *Seligman, Chauncey, Nachlas, Manheimer, and Ravin,* 7
Phosphate: Adenosinetri-. *See* Adenosinetriphosphate
Phospholipide(s): Brain, hyperinsulinism effect, *McGhee, Papageorge, Bloom, and Lewis,* 127
Phosphorylase: Amino acids, *Velick and Wicks,* 741
Phosphorylation: Dihydrodiphosphopyridine nucleotide oxidation, relation, *Lehninger,* 345
Oxidative, homogenates and cell particles, *Potter, Lyle, and Schneider,* 293
—, myokinase and adenine nucleotide specificity, *Barkulis and Lehninger,* 339
Pork: Amino acids, *Schweigert, Bennett, and Guthneck,* 697
Porphyrin: Methyl esters, chromatography, *Chu, Green, and Chu,* 643
Potato: Enzyme, branching, *Beckmann and Roger,* 467
Proline: Analysis, isotope use, *Velick and Udenfriend,* 721
-Arginine interdependence, *Leuconostoc mesenteroides, Sirny, Cheng, and Elvehjem,* 547
Protease(s): Pancreas, molecular size and shape, *Schwert,* 799
Schwert and Kaufman, 807
Protein(s): Amino end-groups, analysis, isotope use, *Udenfriend and Velick,* 733
Blood plasma, *Abdou and Tarver,* 769, 781
— —, catabolism to carbon dioxide, *Abdou and Tarver,* 769
— —, loss, *Abdou and Tarver,* 769
— —, tissue and, relation, *Abdou and Tarver,* 781
Hydrolysates, lysine preparation, *McCollum and Rider,* 451
Soluble, liver, electrophoresis, *Sorof and Cohen,* 303
—, —, — and ultracentrifugation, *Sorof and Cohen,* 311
Protein(s)—*continued:*
Vitamin B_{12}-binding, *Bird and Hoevet,* 181
Pseudomonas aeruginosa: Tricarboxylic acid cycle, *Campbell and Stokes,* 853
Purine(s): Biosynthesis, formate rôle, *Marsh,* 633
Pyridine: Dihydrodiphospho-. *See* Dihydrodiphosphopyridine
Pyrimidine nucleoside: Antagonists, *Fukuhara and Visser,* 95
Pyrophosphate: Tetraethyl. *See* Tetraethyl pyrophosphate

R

Racemase: *Streptococcus faecalis, Wood and Gunsalus,* 403
Reichstein: Compound L acetate, blood plasma, liver, and kidney vitamin A effect, *Bodansky and Markardt,* 83
Roentgen ray: Hemoglobin biosynthesis, effect, *Richmond, Altman, and Salomon,* 817

S

Scurvy: Adrenal ascorbic acid, effect, *Banerjee and Deb,* 177
— cholesterol, effect, *Banerjee and Deb,* 177
Serine: Homo-. *See* Homoserine
Sodium desoxyribonucleate: Isolation, *Marko and Butler,* 165
Steroid(s): Adrenal, body composition, relation, *Kochakian and Robertson,* 495
Streptococcus faecalis: Racemase, *Wood and Gunsalus,* 403

T

Testosterone: Metabolism, kidney, *West and Samuels,* 827
-Related steroids, metabolism, kidney, *West and Samuels,* 827
Tetraethyl pyrophosphate: Inhibition, reversibility, *Wilson,* 111
Thiamine: Oxy-. *See* Oxythiamine
Threonine: *Neurospora methionineless* mutant, *Fling and Horowitz,* 277

Tobacco: Mosaic virus, isoelectric points, *Oster*, 55
Tocopherylhydroquinone: α-, esters, preparation and determination, *Farber, Mackenzie, Rosenkrantz, and Milhorat*, 445
Transamidation: Reactions, enzyme-catalyzed, peptide chain elongation, *Fruton, Johnston, and Fried*, 39
Tricarboxylic acid: Cycle, *Pseudomonas aeruginosa, Campbell and Stokes*, 853
—, related substances, ketosis, effect, *Beatty and West*, 603
Trypsin: Casein digestion, pressure-temperature relationship, *Fraser and Johnson*, 417
α-Chymo-. *See* Chymotrypsin
Crystalline, inhibitor, colostrum, *Laskowski and Laskowski*, 563
Trypsinogen: Chymo-. *See* Chymotrypsinogen
Tyrosine: Oxidation system, liver, *La Du and Greenberg*, 245
— —, — acetone powder, *La Du and Greenberg*, 245

U

Uricase: Intracellular, localization, *Schein, Podber, and Novikoff*, 331
Urine: Amylase, determination, saccharific, *Kibrick, Rogers, and Skupp*, 107

V

Valeric acid: α-Keto-β-methyl-. *See* Keto-β-methylvaleric acid
Valine: Analysis, isotope use, *Velick and Udenfriend*, 721
Carbon origin, *Tatum and Adelberg*, 843
Virus: Tobacco mosaic, isoelectric points, *Oster*, 55
Vitamin(s): A, blood plasma, Reichstein's Compound L acetate, effect, *Bodansky and Markardt*, 83
—, kidney, Reichstein's Compound L acetate, effect, *Bodansky and Markardt*, 83
—, liver, Reichstein's Compound L acetate, effect, *Bodansky and Markardt*, 83
B_{12}, liver, intracellular distribution, *Swendseid, Bethell, and Ackermann*, 791
B_{12}-binding, proteins, *Bird and Hoevet*, 181
C. *See also* Ascorbic acid

X

X-ray: *See* Roentgen ray
